

Efficient Product Rebates

Commercial Pumping Equipment Rebate Guide

The following table lists the product requirements and rebates available for a range of energy-efficient pumping technologies. For more information on where to purchase rebated products please visit our website efficiencyns.ca/business.

Rebates that state availability as “in-store” have a rebate applied at the time of purchase at one of our participating distributor partners.

If your utility bill is less than \$3,800 monthly and you have not yet purchased your products, your business may qualify for rebates in addition to those listed here.

High Efficiency Circulator Pump

Product	Availability	Max Power Input (Watts)	Product Requirements	Rebate
High Efficiency Circulator Pump	In-store	< 150W	<ul style="list-style-type: none"> Utilizes permanent magnet motor Contains integral variable speed drive (VFD) which automatically powers, based on system demand. 	\$60
		150 - 499W		\$110
		500 - 2,500W		\$400

High Efficiency Booster Pump

Product	Availability	Product Requirements	Rebate
Booster Pump System with VFDs	Mail-in	<ul style="list-style-type: none"> New pump system hp must be greater than 5 hp (up to 50 hp) are eligible New pump system hp must be equal to or less than that of the existing system, but no less than 60% of existing system hp New pump system must contains variable frequency drive (VFD) which automatically powers, based on system demand Hp from backup systems (does not include standby configuration) is not eligible Please contact us for incentives on pumping systems over 50 hp 	\$2500+ \$300/hp reduced
