

## Mini-Split Heat Pumps - Rebate Eligible Units

### New Minimum Performance Standards

- As of January 2023, all heat pumps sold in Canada are now legally required to be tested under the new M1 standard (HSPF2, SEER2). As such, only systems with M1 ratings [registered with NEEP](#) will be added to this list going forward.
- Natural Resources Canada has re-mapped the climate zones in Canada and now defines most of the country under Region V and now requires Region V data to be registered with NEEP in order for the system to be added to this list.

New Minimum Performance Standards	
Specification	All Efficiency Nova Scotia Delivered Programs
Heating System Performance Factor (HSPF2) (Region V)	≥ 6.6
Seasonal Energy Efficiency Ratio (SEER2)	≥ 15.2
Coefficient of Performance (COP) at Maximum Capacity (5°F)	≥ 1.8
Capacity Maintenance (Maximum 5°F/Rated 47°F)	≥ 70%

### Previous Minimum Performance Standards

- After June 2025 ALL SYSTEMS must meet the New Minimum Performance Standards (see table above).** For heat pumps that do not have HSPF2 and SEER2 values, previously established HSPF and SEER eligibility criteria (see table below) will apply until June 2025.

Previous Minimum Performance Standards		
Specification	Greener Homes	Home Energy Assessment & Heating System Rebates*
Heating System Performance Factor (HSPF) (Region IV)	≥ 10	≥ 10 (multi-head systems) ≥ 11 (single-head systems)
Seasonal Energy Efficiency Ratio (SEER)	Not applicable	≥ 17
Coefficient of Performance (COP) at Maximum Capacity (5°F)	≥ 1.8	≥ 1.75
Capacity Maintenance (Maximum 5°F/Rated 47°F)	≥ 70%	Not applicable

### Rebates

- Rebates in some programs can stack (indicated in the table below). Look for a ✓ in all relevant columns of a heat pump system to maximize your rebates.
- [Greener Homes](#) is not accepting new applicants after February 5<sup>th</sup>, 2024.
- Moderate Income Rebates (MIR)** and **Oil to Heat Pump Affordability Rebates (OHPA)** are both income pre-qualifying programs, you must [apply to Efficiency Nova Scotia](#) and receive approval prior to beginning retrofits.
- Apply to **Home Energy Assessment** by booking an EnerGuide assessment with a [Registered Energy Advisor](#). Please contact your Service Organization for a follow up energy evaluation once you have finished your planned home upgrades to initiate the rebate review process.
- If you do not wish to complete an energy evaluation through **Home Energy Assessment**, you may apply for a rebate from the **Heating System Rebates\*** program.
- Participation is limited to either the **Home Energy Assessment** OR **Heating System Rebates\*** program. If customers or contractors enroll in both programs, rebates will be processed based on the first project reviewed by Efficiency Nova Scotia.
- Home Energy Assessment** program calculates rebates based on the "Rated Capacity Btu/hr (47°F)" column. If a heat pump(s) is already installed in the home, rebates will be calculated based on the added capacity. Rebates are pro-rated, based on the ton.
  - Home Energy Assessment** example: Eligible 18,000 BTU heat pump (18,000 btu = 1.5 tons) will yield \$450 (\$300/ton x 1.5 tons = \$450).

## Mini-Split Heat Pumps - Rebate Eligible Units

- Please refer to the table below for rebate amounts. Visit the Efficiency Nova Scotia website, or call our Energy Solutions Advisors at 1-877-999-6035, to learn more about how to maximize your rebates. Your total eligible rebate amount will be capped as the cost of the upgrade.

Rebates				
Specification	Greener Homes <i>(Can stack with Home Energy Assessment)</i>	Oil to Heat Pump Affordability Program <i>(Can stack with Home Energy Assessment OR Heating Systems Rebates)</i>	Home Energy Assessment or Heating System Rebates	Moderate Income Top-Ups <i>(Can stack with Home Energy Assessment)</i>
1 indoor head	\$0	All eligible costs up to \$15,000 <i>(see below)</i>	\$300/ton	\$1,000/ton
2 indoor heads	\$2,500			
3 or more indoor heads	\$5,000			

### Other important eligibility criteria:

- Leased equipment is not eligible for rebate.
- Home Energy Assessment** and **Heating System Rebates\*** programs do not provide rebates for the replacement of existing heat pumps - functioning or non-functioning. **Greener Homes** rebates will be issued for replacement systems.
- Indoor heat pump equipment must be installed in conditioned spaces so that it operates as intended.
- Slim, compact, and mix ducted heat pumps are ineligible for rebates through **Home Energy Assessment, Moderate Income, and Heating System Rebates\***.
- Installation must be performed by a certified Refrigeration and Air Conditioning Mechanic (RACM).
- Greener Homes & Oil to Heat Pump Affordability** rebates will only be issued for systems that meet the following criteria:
  - Designed to supply heat to the entire home, including basements that are 6 feet high or taller. At a minimum, there should be one indoor head per floor;
  - Minimum total "Rated Capacity Btu/hr (47°F)" of the system must be 12,000 BTU, or 1 ton;
  - Compressors must be of variable capacity with three or more distinct operating speeds, or continuously variable speed; and
  - Customer must purchase equipment from Canadian installers or distributors. This must be reflected on customer receipts.
- Oil to Heat Pump Affordability eligible costs** include eligible cold climate heat pump systems, electrical/mechanical upgrades required to install the heat pump, expenses for safe removal/decommissioning of oil tanks, installing a back-up electric heating system (as needed), and electrifying other oil-using household systems e.g. domestic hot water (as needed).

[\\*Please review the Heating System Rebates program webpage for full system eligibility requirements.](#)

### List Summary

**Total Units: 5,814**

**Greener Homes Eligible Units: 5,814**

**Oil to Heat Pump Affordability Eligible Units: 5,814**

**Home Energy Assessment, Moderate Income, & Heating System Rebates Eligible Units: 3,469**
